

federal license or permit activities affecting any coastal use or resource which are not required to be described in detail in OCS plans but which are subject to State agency consistency review (e.g., Corps of Engineer permits for the placement of structures on the OCS and for dredging and the transportation of dredged material, Environmental Protection Agency air and water quality permits for offshore operations and onshore support and processing facilities). In the event the person does not consolidate such OCS-related permit activities with the State agency's review of the OCS plan, such activities will remain subject to individual State agency review under the requirements of subpart D of this part.

(b) A State agency objection to one or more of the OCS-related federal license or permit activities submitted for consolidated review shall not prevent the person from receiving Federal agency approval:

(1) For those OCS-related license or permit activities found by the State agency to be consistent with the management program; and

(2) For the license or permit activities described in detail in the OCS plan provided the State agency concurs with the consistency certification for such plan. Similarly, a State agency objection to the consistency certification for an OCS plan shall not prevent the person from receiving Federal agency approval for those OCS-related license or permit activities determined by the State agency to be consistent with the management program.

§ 930.82 Amended OCS plans.

If the State agency objects to the person's OCS plan consistency certification, and/or if, pursuant to subpart H of this part, the Secretary does not determine that each of the objected to federal license or permit activities described in detail in such plan is consistent with the objectives or purposes of the Act, or is necessary in the interest of national security, and if the person still intends to conduct the activities described in the OCS plan, the person shall submit an amended plan to the Secretary of the Interior or designee along with a consistency certification and data and information nec-

essary to support the amended consistency certification. The data and information shall specifically describe modifications made to the original OCS plan, and the manner in which such modifications will ensure that all of the proposed federal license or permit activities described in detail in the amended plan will be conducted in a manner consistent with the management program. When satisfied that the person has met the requirements of the OCSLA and this subpart, the Secretary of the Interior or designee shall furnish the State agency with a copy of the amended OCS plan (excluding confidential and proprietary information), necessary data and information and consistency certification.

[71 FR 829, Jan. 5, 2006]

§ 930.83 Review of amended OCS plans; public notice.

After receipt of a copy of the amended OCS plan, consistency certification, and necessary data and information, State agency review shall begin. The requirements of §§ 930.77, 930.78, and 930.79, apply to the review of amended OCS plans, except that the applicable time period for purposes of concurrence by conclusive presumption shall be three months instead of six months.

§ 930.84 Continuing State agency objections.

If the State agency objects to the consistency certification for an amended OCS plan, the prohibition in § 930.80 against Federal agency approval of licenses or permits for activities described in detail in such a plan applies, further Secretarial review pursuant to subpart H of this part may take place, and the development of an additional amended OCS plan and consistency certification may be required pursuant to §§ 930.82 through 930.83.

§ 930.85 Failure to substantially comply with an approved OCS plan.

(a) The Department of the Interior and State agencies shall cooperate in their efforts to monitor federally licensed or permitted activities described in detail OCS plans to make certain that such activities continue to conform to both federal and State requirements.
